

**Frank Happenings**

Jack Foster, of the McCall Oil Co., Calgary, was in town today.

Work on the new Methodist parish hall is going ahead rapidly.

Mrs. J. Fairhurst and Mrs. Hamilton were visitors at Hillcrest on Tuesday.

Mrs. A. J. McKinnon motored to Michel this morning, where she will visit friends for a few days.

The offices of the Franco-Canadian Collieries Co. are being remodeled by Contractor Sinclair, of Blairmore.

A. V. Turner, school principal, returned this week from his summer vacation, spent at the Edmonton summer schools.

W. H. Hilton and Alf. Tristram returned from Calgary by train on Friday last, having left their car in the cow town for repairs.

Tom Dawson, Jack Bone, J. Gibson and Harry Jepson will accompany Bob Niven and Fred Raynor to North Fork next week.

A party including "Bob" Niven and Freddie Raynor intend leaving early next week on a two week's fishing and hunting trip along the upper waters of the North Fork.

H. D. and Mrs. MacKay returned on Sunday last from a two week's camping and fishing trip on the North Fork. They leave today for Gleichen, where Mr. MacKay resumes his duties as school principal.

Louis Weng, until recently cook at the Comptonian hotel, Blairmore, has opened up the old Frank restaurant, where he hopes after thoroughly renovating the place to conduct an up-to-date restaurant.

Work on the foundation for the new school is progressing rapidly and it is hoped to have the new building in readiness before the

end of September. In the meantime arrangements are being made to accommodate the classes until the new building is completed.

H. A. Howard, manager of the Trusts & Company Co., Calgary, was in town today accompanied by a military hospital commissioner, who looked over the Sanatorium with a view to the Government acquiring same as a hospital for returned soldiers.

Laurence Ryan was renewing acquaintances around here this week and is evidently becoming associated with deal people requiring commissions. We understand that he spent a day at both Bellevue and Blairmore, but could find no prospects for business except with some of the merchants. We know of lots of dead merchants who only require the addition of a headache to complete the job.

At a general meeting of the shareholders and directors held at the office of the Franco-Canadian Collieries, Ltd., at Frank, on Thursday last, directors were elected for the ensuing year, and other important business was transacted. The report of the secretary-treasurer for the past year was very encouraging and prospects for the future of the mines at Frank were shown to be very promising.

An enjoyable farewell party was given to Mrs. J. J. Thomas by a number of her friends from Frank and Blairmore at her home on Wednesday night, when she was presented with an address and a beautiful cut-glass sugar bowl and cream jug. Mr. F. M. Pinkney, of Blairmore, made the formal presentation. Mrs. Thomas leaves this weekend for her new home at Altona, Alta., a small farming town about sixty miles southeast of Kamloops.

Emitting a series of blood-curdling yell, Chong Hing, a Chinese man, pursued E. Brown, an alleged pickpocket, along Hastings

**To Buy The Brisco Block**

We understand that negotiations are in progress between the owners of the Brisco block, on Victoria Street, and F. S. Kafouri, of the Blairmore Trading Company. The deal if put through will represent a turnover of several thousands of dollars. The Brisco block is one of the best business stands in the town, and the new landlord will no doubt be amply rewarded for his enterprise.

street, Vancouver, one day last week, and in the midst of a dense crowd, and was paid off by a sum of \$1400. The Chinaman is a mill contractor and had just drawn \$4000 from the bank to pay workmen.

It is reported that during the commotion caused by the explosion in New York recently a typewriter fell from the Woolworth building — the highest in the world — to the concrete sidewalk without being damaged. The explanation is that the young lady stenographer who used the machine had it all stuck up with gum, or else the clock struck suddenly the night before and she had suddenly departed leaving the "commut" and "period" keys down, and the machine made a slight pause before coming to a full stop.

With a payment of \$665,000 outside of court the White Star line stands absolved of all liability for the sinking of the steamship Titanic, with a loss of 1600 lives, and the four years of litigation of claimants is brought to an end in a final decree handed down by federal judge Mayer at New York. Claims totalling \$18,000,000 had been recorded by hundreds of claimants, alleging that the ship was lost through the negligence of her navigators. Evidence at the trial indicated that the disaster was accidental, the claimants under terms of a compromise made outside of court agreed to accept the payment of \$665,000 and withdraw their claims.

A home for the widow and orphans of Orangemen and also for aged members in destitute circumstances is to be erected in the west by the three grand lodges of Saskatchewan, Manitoba and Alberta. The location has not been arranged yet.

The repeated unofficial reports that Portugal was about to take an active share on the European battlefield are apparently confirmed by an announcement from Paris that a Franco-British military commission has been sent to Lisbon.

Eleven Hun prisoners escaped from a convert prison in France by means of an underground tunnel which probably took weeks to dig. Four of the escapees were captured, one of whom had on his person a chart of the surrounding country.

# A Lesson From The Aeroplane

The force that makes the aeroplane — a heavier than air machine — overcome the law of gravity is the propulsive power of the motor. Stop the engine and gravity exhibits its law.

In much the same way the propulsive power of advertising makes a business triumph over dragging-down tendencies, personal, inert, quiet times and general business depression.

Advertising is the propeller. The merchant is the pilot. His business is the machine. His community is his sustaining medium. If you want business to start, start the motor of advertising.

# GOOD WORK OF DOMINIONS HAS BEEN REVELATION TO THE WORLD

GEN. ROBERTSON ON SOME PHASES OF THE WAR

Expresses High Appreciation of the Splendid Fighting Spirit And Well Organized Canadian Armies, Which Have Demonstrated the Quality of Manhood

"No, we really are not worried by the course of the war," said General Sir William R. Robertson, chief of the imperial staff, at army headquarters, in a speech to the Canadian Associated Press.

"As to the war, we will tell the story of our progress. And the happy expression of the Canadian people on the front reflects the spirit of the masses. Do you notice that all published photographs show them smiling or laughing?"

The general himself smiled as he spoke, and it was evident that he had fully conveyed his realization of the fact that he was breaking the silence of the war, and righting a wrong at the beginning of the year.

He received the correspondent while seated at a table, with a pipe in his mouth, and a foot of the wire which permits him with the aid of maps and the compass to follow the moves in the conflict in France.

The room is in keeping with the character of the man, simple and with such spartan simplicity that the table, charts and map rack are the only "out."

Our hearts were touched by the ready response of our fellow Britishers to the call to arms, "We are with you," the general continued. "To say we are proud of these men—estimating the value of the sons of Canada in which these sturdy sons of Australia, New Zealand, South Africa, Canada and the gallant little foundland came forward with their tremendous support in the end that we had a revelation to the world."

"The type of government is not so bad after all. Yes, they are still coming and still fighting. The Canadians in particular parts of the empire, the Canadians can learn again through the example of the British, the splendid fighting spirit and well-organized armies. At Ypres, Festubert, Neuve Chapelle, the Canadians in their engagements they demonstrated the high type of vigorous manhood produced by our schools."

The subject of general speculate as to how long the war would last caused him to shrug his shoulders and smile.

"That is a question touching human nature, which means dealing with a dubious proposition," he said. "It is with the world."

Referring to the complimentary references by military experts to the work of the British in the offensive, Sir William remarked: "The work of the British in the offensive is the best use of cavalry in the offensive. Sir

Wolseley remarked: 'The work of the British in the offensive is the best use of cavalry in the offensive.'

That is with the world."

He is with the world."

Speaking of training and manning, a recent visitor to the large stockyards in the South remarked that 90 per cent. of the cattle present there are either of Polled or Shorthorn blood. Sir William adds emphasis to the recent statement in these columns as to the importance of the stock offered in the per cent. of the stock offered in this way was finished at 24 months of age.

As will be seen from the statement below, several of the constitutencies returning a large number of men, particularly those who have been serving more than a year, are the result of the entry into the service of one class after another.

On the other hand, it is to be noted that some have been serving considerably short of their allotment and this is one in the unavoidable position of giving notice when ever.

The statement of training and manning will be paid up to June 30th following.

## Used Liquid Fire

### Horrors of Work of German Invention Graphically Described

A French officer, in his diary, recently published, describes the horrors of the German burning liquid machine. Describing a battle he was while this was going on, that one of my corporals called me to his aid. It was very interesting, and was destined to turn the tables on the enemy. He took me to the front of the parapet of the Boche trench. I recognized it as a Boche trench, and was very surprised to find it was a pock mark. It was very simple. It had been brought through seas in a pocket lamp. It was all ready to be used.
